Ideation Phase
Brainstorm & Idea Prioritization Template

Project name	ai-enhanced intrusion detection system

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

⏱ 10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Person 1

| 1. Deep Learning with Autoencoders for Anomaly Detection | 2. Time-Series Analysis with LSTM (Long Short-Term Memory) Networks | 3. Unsupervised Learning using Clustering Algorithms (e.g., DBSCAN, Isolation Forest) |

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

⏱ 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

| Data Collection and Preprocessing Team | 2. Model Development Team | 3. Evaluation and Testing Team |

4. Deployment Team

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⏱ 20 minutes

TIP

Pro tip: you can then quickly move sticky-notes around to go on the grid. This facilitator can confirm the sort by using the team gesture (sorting the H key in the keyboard).

Importance

- Autoencoder-Based Detection
- LSTM Time-Series Model
- Data Preprocessing and Feature Engineering
- Deployment and Dashboard
- Unsupervised Clustering (e.g., DBSCAN, Isolation Forest)

Feasibility

Regardless of their importance, which ideas are most feasible given effort (cost, time, effort, complexity, etc).

→

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural
Share a clear link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
Define the components of a new idea or strategy.
